

What does Growth Mindset look like in our school?

Growth Mindset is an approach that encourages everybody to keep trying and to see mistakes as an important part of learning.

This is what pupils and staff are saying:

Max from 6TH said, "When I'm stuck and I've asked all my friends and I've read it twice, I read it again and keep going."

Miss Walker said, "There is no failure, we are just developing."

Miss Parvin said, "We're working on it!"

Harrison and Will from 4GW said, "Never give up! Once you've started, always finish. Try more on your own before asking your teacher for help."

The children understand that through effort they can grow and develop their brains. Dr Wilkinson explained more about this in a presentation to the school. Here is Mrs Nation's brain being scanned!

The children are collecting stamps when they show great Growth Mindset in class. They will receive a Bronze certificate for 10 stamps; a Silver certificate for 25 and a Gold for a full card of 40 stamps.

Here is the Bronze certificate

The aim is to embed Growth Mindset into our culture so that it becomes second nature and part of who we are and how we think.
